14 On the grid show, by shading, the region that satisfies all of these inequalities.

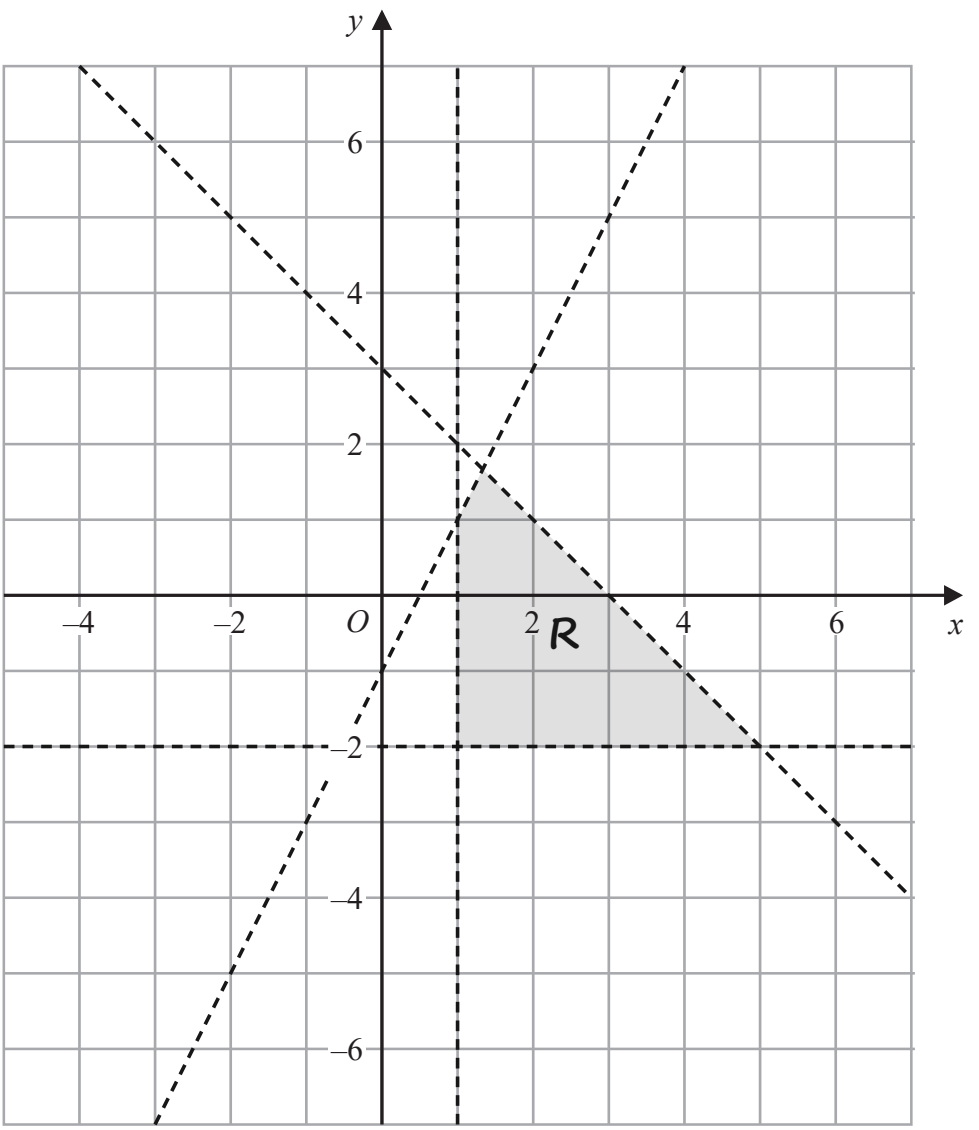

$$x + y < 3 \qquad x > 1 \qquad y > -2 \qquad y < 2x - 1$$

Label the region **R**.

1 mark
Draw x = 1 and y = −2. Dashed boundaries: strict inequalities.

1 mark
Draw x + y = 3, through (0, 3) and (3, 0).

1 mark
Draw y = 2x − 1.

1 mark
Shade the overlap: right of x = 1, above y = −2, below both sloping lines.

(Total for Question 14 is 4 marks)
