20 Ami and Josh use a calculator to work out $\dfrac{595}{4.08^2 + 5.3}$

Ami's answer is 27.1115
Josh's answer is 271.115

One of these answers is correct.

Use approximations to find out which answer is correct.

$595 \approx 600$, $4.08 \approx 4$ and $5.3 \approx 5$.

$$\frac{600}{4^2 + 5} = \frac{600}{21}$$

2 marks total
Use sensible approximations and calculate an estimate

21 is close to 20, and $600 \div 20 = 30$.

27.1115 is close to 30, so Ami is correct.

1 mark
Select the answer supported by the estimate
