10 Here is part of a distance-time graph for a car's journey.

(a) Between which two times does the car travel at its greatest speed?
Give a reason for your answer.

From 0 seconds to 20 seconds.

This section has the steepest gradient.

1 mark
Correct time interval

1 mark
Speed is the gradient

(2)

(b) Work out this greatest speed.

The distance rises from 0 m to 360 m in 20 s.

	s	m
	20	360
÷ 20		÷ 20
	1	18

Speed = distance ÷ time

= 360 ÷ 20 = 18 m/s

1 mark
Correct speed; follow-through from (a) allowed

18 m/s

(1)

(Total for Question 10 is 3 marks)
