20 Work out the value of $\dfrac{3^7 \times 3^{-2}}{3^3}$

Same base: add powers when multiplying, subtract when dividing.

$\dfrac{3^7 \times 3^{-2}}{3^3} = 3^2 = 9$

1 mark
Exponent: 7 + (−2) − 3 = 2

1 mark
Evaluate the remaining power

9

(Total for Question 20 is 2 marks)
