6 Sue has 2 cats.

Each cat eats $\frac{1}{4}$ of a tin of cat food each day.

Sue buys 8 tins of cat food.

Has Sue bought enough cat food to feed her 2 cats for 14 days?
You must show how you get your answer.

Each day: 2 × ¼ = ½ tin = 0.5 tin.

1 mark
Find the daily total for both cats

	Days	Tins	
×14	1	0.5	
	14	7	×14

1 mark
Scale the daily total to 14 days

They need 7 tins. Sue has 8 tins.

Yes: 8 > 7, so there is enough food.

1 mark
Compare correct amounts and state Yes

(Total for Question 6 is 3 marks)
