13 A square has an area of 81 cm^2

(a) Find the perimeter of the square.

Side length = √81 = 9 cm

1 mark
Square root of the area

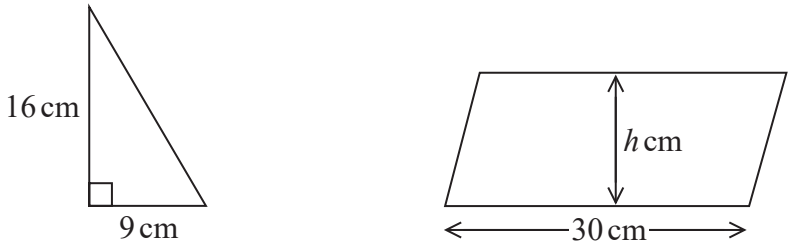

Perimeter = 4 × 9 = 36 cm

1 mark
All four sides

36 cm

(2)

The diagram shows a right-angled triangle and a parallelogram.

The area of the parallelogram is 5 times the area of the triangle.
The perpendicular height of the parallelogram is h cm.

(b) Find the value of h.

Triangle area = ½ × 9 × 16 = 72 cm^2

1 mark
Find the triangle area

Parallelogram area = 5 × 72 = 360 cm^2

30h = 360
÷30 ÷30
h = 12

1 mark
Equate 30h to five times the triangle area

1 mark
Correct perpendicular height

h = 12

(3)

(Total for Question 13 is 5 marks)
