21 Sean has information about the height, in cm, and the weight, in kg, of each of ten rugby players.

He is asked to draw a scatter graph and a line of best fit for this information.

Here is his answer.

Sean has plotted the points accurately.

Write down two things that are wrong with his answer.

1 *The line does not follow the overall trend of the points.*

1 mark

A line of best fit should run through the scatter

2 *The height scale is not linear: 140 to 160 is a jump of 20,*

but the other equally spaced intervals represent only 10.

1 mark

Identify the inconsistent height intervals

(Total for Question 21 is 2 marks)
