8 Prasha has five blocks of wood.

The total weight of all five blocks of wood is 3 kilograms.
4 of the blocks of wood each have a weight of 650 grams.

Work out the weight, in grams, of the other block of wood.

3 kg = 3000 g

4 × 650 = 2600 g

3000 – 2600 = 400 g

3 marks total
Convert kg to g
Weight of four blocks
Subtract: 400 g

..... grams

(Total for Question 8 is 3 marks)
