20 The graph of $y = f(x)$ is shown on the grid.

(a) On the grid, draw the graph with equation $y = f(x + 1) - 3$

(2)

Point $A(-2, 1)$ lies on the graph of $y = f(x)$.

When the graph of $y = f(x)$ is transformed to the graph with equation $y = f(-x)$, point A is mapped to point B.

(b) Write down the coordinates of point B.

f(x + 1) shifts left 1; −3 shifts down 3.

2 marks total
Translate (−1, −3)
Join all five critical points

Reflection in y-axis: (−2, 1) → (2, 1).

1 mark
B = (2, 1)
