21 The table shows some information about the weights of 50 potatoes.

Weight (w grams)	Frequency
$10 < w \leqslant 20$	6
$20 < w \leqslant 30$	21
$30 < w \leqslant 40$	13
$40 < w \leqslant 50$	7
$50 < w \leqslant 60$	3

Iveta drew this frequency polygon for the information in the table.
The frequency polygon is **not** fully correct.

Write down **two** things that are wrong with the frequency polygon.

1 *First point is (15, 8), but the table says (15, 6).*

2 marks total
~~First point wrong~~
Do not close polygon

2 *First and last points were wrongly joined.*

(Total for Question 21 is 2 marks)
