8 The number of days, d, that it will take to build a house is given by

$$d = \frac{720}{n}$$

where n is the number of workers used each day.

Ali's company will take 40 days to build the house.
Hayley's company will take 30 days to build the house.

Hayley's company will have to use more workers each day than Ali's company.

How many more?

$d = 720/n$, so $n = 720/d$.

Ali uses $720 \div 40 = 18$ workers.

Hayley uses $720 \div 30 = 24$ workers.

Hayley uses $24 - 18 = 6$ more workers.

3 marks total
Find 18 or 24
Find both and subtract
6 more workers

.....

(Total for Question 8 is 3 marks)
