12 Cornflakes are sold in two sizes of box.

Size of box	Weight of cornflakes
small	450 g
large	750 g

Rae buys 3 small boxes of cornflakes and some large boxes of cornflakes.
In total she buys 5850 g of cornflakes.

Work out the number of large boxes of cornflakes Rae buys.

Small boxes weigh 3 × 450 = 1350 g

Large boxes weigh 5850 – 1350 = 4500 g

Number of large boxes = 4500 ÷ 750 = 6

3 marks total
Find 1350 g
Find 4500 g
6 large boxes

.....

(Total for Question 12 is 3 marks)
