16 In a bag there are only red counters, blue counters, green counters and yellow counters.
A counter is taken at random from the bag.

The table shows the probabilities of getting a red counter or a yellow counter.

Colour	red	blue	green	yellow
Probability	0.4	0.15	0.20	0.25

the number of blue counters : the number of green counters = 3 : 4

Complete the table.

Blue + green = 1 − 0.4 − 0.25 = 0.35

Ratio parts = 3 + 4 = 7, so one part = 0.05

Blue = 3 × 0.05 = 0.15

Green = 4 × 0.05 = 0.20

4 marks total
Remaining 0.35
Use 3:4 ratio
Find both
0.15 and 0.20

(Total for Question 16 is 4 marks)
