17 Here is the graph of $y = x^2 - 3$

Use the graph to find estimates for the solutions to the equation $x^2 - 2x - 2 = 0$
You must show how you get your solutions.

$x^2 - 2x - 2 = 0$ means $x^2 - 3 = 2x - 1$.

Draw $y = 2x - 1$ on the given quadratic graph.

Read the intersections: $x \approx -0.7$ and $x \approx 2.7$.

4 marks total
Rearrange to graph
Draw straight line
Identify intersections
−0.7 and 2.7

(Total for Question 17 is 4 marks)
