9 This scale can be used to change between kilometres and miles.

(a) Use the scale to change 40 kilometres to miles.

On the scale, 40 km reads about 25 miles.

1 mark
25 miles from scale

..... miles

(1)

Here is an approximate rule to change from kilometres to miles.

Divide the distance in kilometres by 10 and then multiply by 6

(b) Use this approximate rule to change 40 kilometres to miles.

40 ÷ 10 × 6 = 4 × 6 = 24 miles.

2 marks total
Divide by 10
Then ×6: 24

..... miles

(2)

(c) Compare your answer to part (b) with your answer to part (a).

.....

The rule gives 24 miles, 1 mile less than the scale (25).

1 mark
Compare 24 with 25

.....

.....

(1)

(Total for Question 9 is 4 marks)
