11 Jack is in a restaurant.
There are 5 starters, 8 main courses and some desserts on the menu.

Jack is going to choose one starter, one main course and one dessert.
He says there are 240 ways that he can choose his starter, his main course and his dessert.

Could Jack be correct?
You must show how you get your answer.

$5 \times 8 = 40$ starter/main pairs.

$240 \div 40 = 6$ desserts, a whole number.

Yes: $5 \times 8 \times 6 = 240$.

2 marks total
40 pairs; 6 desserts
Yes, supported

(Total for Question 11 is 2 marks)
