6

(a) Use these graphs to solve the simultaneous equations

$5x - 9y = -46$

$y = -2x$

The graphs intersect at (−2, 4).

So x = −2 and y = 4.

1 mark
Read intersection
(−2, 4)

$x =$ .....

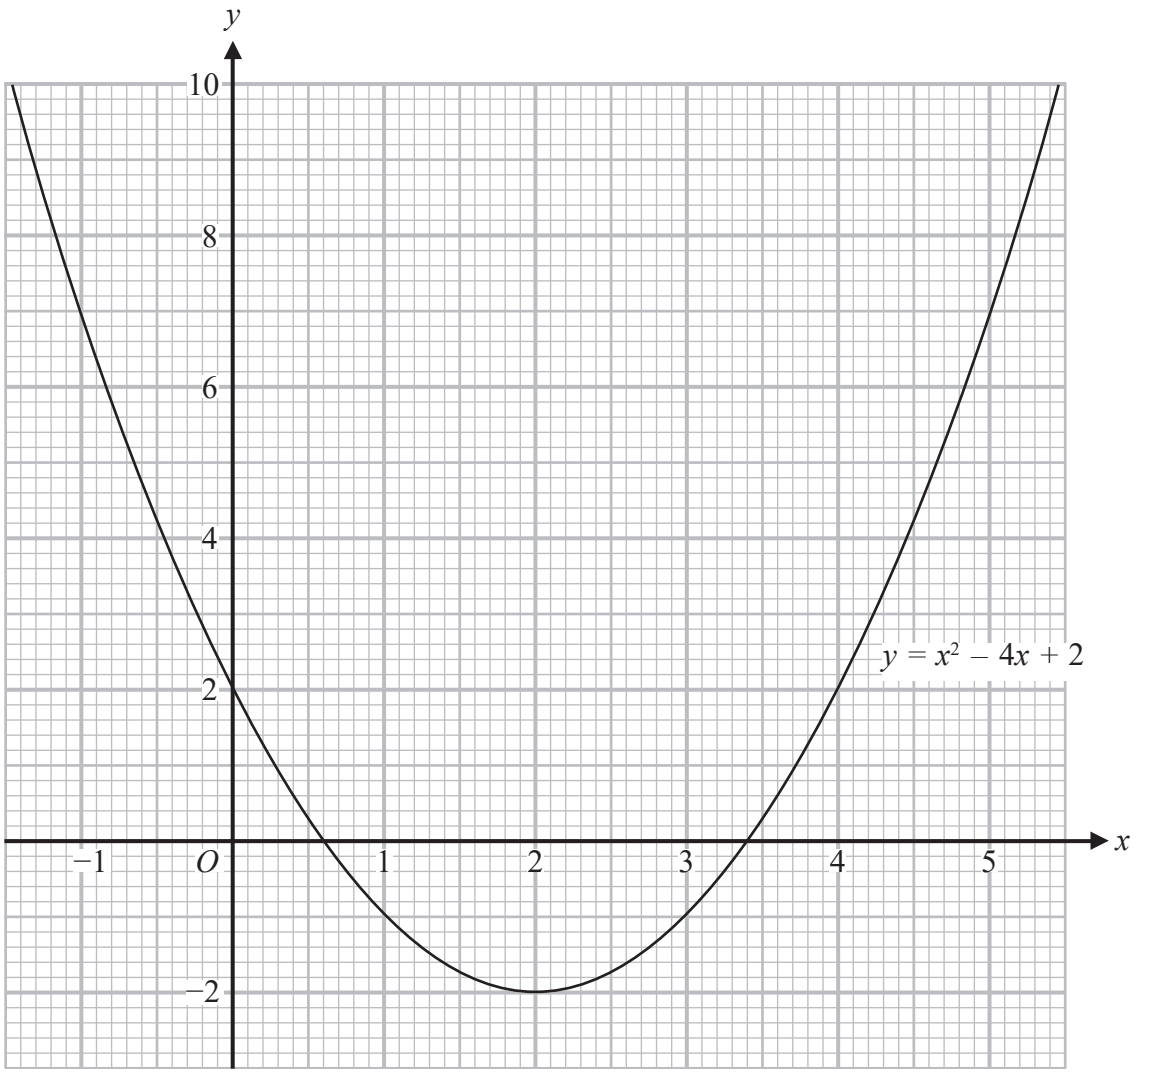

$y =$ .....

DO NOT WRITE IN THIS AREA

(b) Use this graph to find estimates for the solutions of the quadratic equation $x^2 - 4x + 2 = 0$

Read where the parabola crosses the x-axis:

$x \approx 0.6$ and $x \approx 3.4$.

2 marks total

Two x-intercepts
0.6 and 3.4 **(2)**

(Total for Question 6 is 3 marks)
