19 Rachel, Samina and Tom share £600 between them.

Rachel gets $\frac{2}{5}$ of the £600

Samina gets $\frac{1}{4}$ of the money that is left over.

Tom gets the rest of the money.

Tom says,

"I would have got more money if we had shared the £600 equally between us."

Is Tom correct?
You must show how you get your answer.

Rachel: 2/5 × £600 = £240.

Remaining: £600 – £240 = £360.

Samina: 1/4 × £360 = £90.

Tom: £360 – £90 = £270.

Equal share would be £600 ÷ 3 = £200.

No: Tom gets £70 more now.

4 marks total
Rachel £240
Samina £90
Tom £270
No: £270 > £200

(Total for Question 19 is 4 marks)
