9 Alec needs to work out the value of $2 + 3 \times 4$

He writes

$$2 + 3 = 5 \text{ and } 5 \times 4 = 20, \text{ so } 2 + 3 \times 4 = 20$$

Alec is wrong.
Explain why.

1 mark
Multiplication first

Multiply first: 3 × 4 = 12, then add 2.

So 2 + 3 × 4 = 14, not 20.

(Total for Question 9 is 1 mark)
