18 Here is a graph of $y = \sin x°$ for $0 \leqslant x \leqslant 360$

(a) Using this graph, find estimates of all **four** solutions of

$$\sin x° = 0.6 \quad \text{for } 0 \leqslant x \leqslant 720$$

Read y=0.6: x≈37°, 143°; +360° gives 397°, 503°.

37°, 143°, 397°, 503°

1 mark
two angles or +360°

1 mark
all four estimates

(2)

The graph of $y = \sin x°$ is reflected in the x-axis.

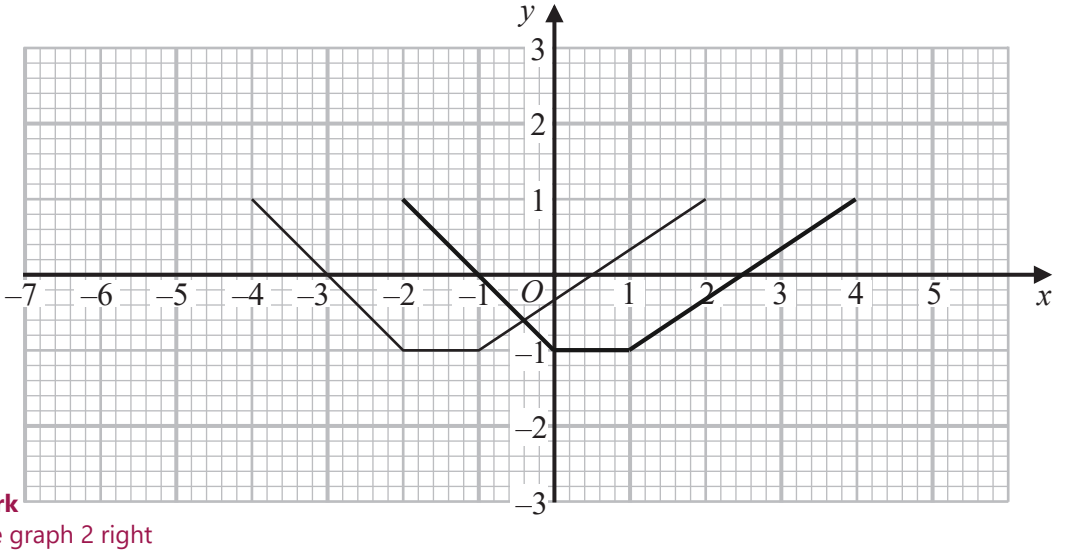

(b) Write down an equation of the reflected graph.

y = -sin x°

1 mark
reflect in x-axis: -sin x

(1)

Here is a graph of $y = f(x)$

1 mark
whole graph 2 right

(c) On the grid, draw the graph of $y = f(x – 2)$

(1)

(Total for Question 18 is 4 marks)
