4 (a) Complete the table of values for $y = x^2 - 2x + 2$

x	–2	–1	0	1	2	3	4
y	10	5	2	1	2	5	10

(2)

1 mark
two or three missing values

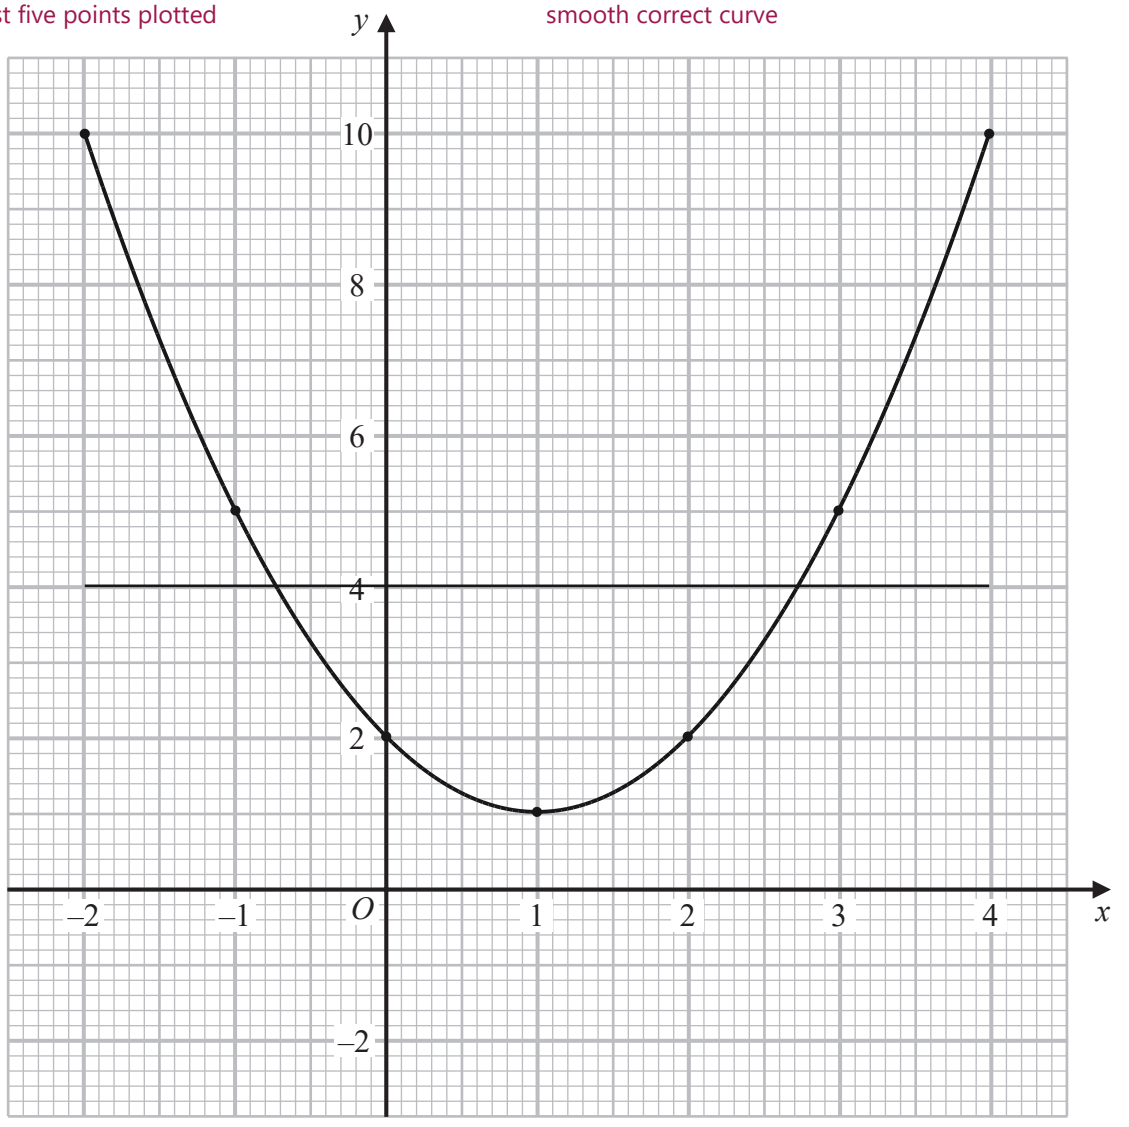

1 mark
all four values

(b) On the grid, draw the graph of $y = x^2 - 2x + 2$ for values of x from –2 to 4

(2)

1 mark
at least five points plotted

1 mark
smooth correct curve

(c) Use your graph to find estimates of the solutions of the equation $x^2 - 2x + 2 = 4$

y=4 cuts the curve at x≈-0.73 and x≈2.73.

-0.73, 2.73

(2)

1 mark
y=4 on the graph

1 mark
both x-values read

(Total for Question 4 is 6 marks)
