11 (a) Write 196 minutes in hours and minutes.

196 = 3 × 60 + 16 minutes.

So 3 hours 16 minutes.

2 marks total
Three full hours
16 minutes

..... hours ..... minutes

(2)

A train travels x miles in 2 hours.

(b) Write down an expression, in terms of x, for the average speed of the train.

Average speed = distance ÷ time = x/2 mph.

1 mark
x/2 mph

..... miles per hour

(1)

(Total for Question 11 is 3 marks)
