6 In a bag there are only red counters, blue counters, green counters and pink counters.
A counter is going to be taken at random from the bag.

The table shows the probabilities of taking a red counter or a blue counter.

Colour	red	blue	green	pink
Probability	0.05	0.15	0.5	0.3

The probability of taking a green counter is 0.2 more than the probability of taking a pink counter.

(a) Complete the table.

Green + pink = 1 – 0.05 – 0.15 = 0.8

Green = pink + 0.2

Pink = 0.3; green = 0.5

1 mark
remaining probability 0.8

1 mark
green 0.5; pink 0.3

(2)

There are 18 blue counters in the bag.

(b) Work out the total number of counters in the bag.

0.15 of all counters is 18

Total = 18 / 0.15 = 120

1 mark
18 ÷ 0.15

1 mark
120 counters

120

(2)

(Total for Question 6 is 4 marks)
