25 *ADC* is a triangle.

AED and *ABC* are straight lines.
EB is parallel to *DC*.

Angle *EBC* = 148°
Angle *ADC* = 63°

Work out the size of angle *EAB*.
You must give a reason for each stage of your working.

Angle AEB = angle ADC = 63° (corresponding; EB parallel DC).

Angle ABE = 180° – 148° = 32° (straight line ABC).

In triangle AEB, angles sum to 180°.

Angle EAB = 180° – 63° – 32° = 85°.

5 marks total
Corresponding angle 63°
Straight-line angle 32°
Triangle angle sum
Correct linked reasons
Final angle 85°

(Total for Question 25 is 5 marks)
