29 Given that $\frac{a}{b} = \frac{2}{5}$ and $\frac{b}{c} = \frac{3}{4}$

find $a : b : c$

$a : b = 2 : 5$ and $b : c = 3 : 4$.

Make $b = 15$ in both: $a : b = 6 : 15$; $b : c = 15 : 20$.

Therefore $a : b : c = 6 : 15 : 20$.

3 marks total
Equate the b terms
Combine linked ratios
6 : 15 : 20

(Total for Question 29 is 3 marks)
