12		9	P1	for process to find the area of a circle in algebraic form, e.g. $\pi(2n + 6)^2$ or $\pi(n - 1)^2$ or $\pi(n + 13)^2$ Condone omission of π or numerical value given throughout
			P1	for process to set up an inequality in n, e.g. $\pi(2n + 6)^2 - \pi(n - 1)^2 > \pi(n + 13)^2$
			P1	for process to remove all brackets, e.g. $4n^2 + 24n + 36 - n^2 + 2n - 1 > n^2 + 26n + 169$ oe
			P1	for isolating the n^2 term, e.g. reduction to $n^2 > 67$
			A1	cao
