**21** Here is an accurate scale drawing of a school playground.

1 cm represents 2 m

Nasim is going to put a seat in the playground.

The seat has to be

less than 9 m from $C$
closer to $BC$ than to $AB$
more than 4 m from $AB$

Show, by shading on the diagram, the region where Nasim can put the seat.

**(Total for Question 21 is 4 marks)**
