

Question		Answer	Mark	Mark scheme	Additional guidance
1	(a)	0.4, 0.4	P1	for process to find sum of unknown probabilities, eg $1 - 0.2 (= 0.8)$	Award mark for any two probabilities given that sum to 0.8, eg given in the table Accept any equivalent fraction or 40%
			A1	oe	
	(b)	60	P1	for complete process to find total number of cubes, eg $12 \div 0.2$ or 12×5 or $(\text{“0.4”} \div 0.2) \times 12 + (\text{“0.4”} \div 0.2) \times 12 + 12$	
				OR states $0.1 = 6$ or $0.4 = 24$	
			A1	cao
