Question	Answer	Mark	Mark scheme	Additional guidance
16	$\frac{4}{5}$	P1	for start of process to find algebraic expression for area, eg $(2x + 3)(5x – 2)$ or $2x \times 3$ or $(2x + 6)(5x – 2)$	Condone missing brackets for this mark
		P1	for complete process to find an equation , eg $(2x + 3)(5x – 2) + 2x \times 3 = 14$ oe or $(2x + 6)(5x – 2) – 3(3x – 2) = 14$ oe	
		P1	for a correct process to write in form $ax^2 + bx + c$ (= 0), eg $10x^2 + 17x – 20 = 0$	We do not need to see "= 0"
		P1	ft a 3 term quadratic , factorising eg $(5x – 4)(2x + 5)$ (= 0) **or** correct use of formula eg $(x =) \frac{-17 \pm \sqrt{17^2 - 4 \times 10 \times -20}}{2 \times 10}$ **or** completing the square, eg $(x + \frac{17}{20})^2 – \frac{289}{400} – 2$ (= 0)	Can be implied by both x values correct
		A1	$x = \frac{4}{5}$ oe
