Question	Answer	Mark	Mark scheme	Additional guidance
8	Tim is wrong (supported)	P1	for process to find area of circle of radius 4, ie $\pi \times 4^2 (= 16\pi)$ or to find area of circle of radius 6, ie $\pi \times 6^2 (= 36\pi)$	Allow use of $\pi = 3$ or better for the award of the first 2 marks.
		P1	for process to compare 2 figures, eg "16π" and "36π" – "16π"	
			or "36π" ÷ "16π"	
		C1	Statement from correct figures, eg No, because the shaded area is not the same as the unshaded area or No, because the area of the smaller circle is not a half of the area of the larger circle.	Correct figures must be used to make the statement though they may not be seen as part of the final statement.
