Question	Answer	Mark	Mark scheme	Additional guidance
9 (a)	$x \geqslant -\frac{9}{2}$	M1	for a first step, eg $4x + 3 \geqslant 2(x - 3)$ oe or $\frac{4x}{2} + \frac{3}{2} \geqslant x - 3$ oe	Accept incorrect inequality sign or equals sign for first 2 marks.
		M1	for isolating terms in x, eg $2x \geqslant -9$ oe or for critical value, $-\frac{9}{2}$ oe	
		A1	for $x \geqslant -\frac{9}{2}$ or $x \geqslant -4\frac{1}{2}$ or $x \geqslant -4.5$	
(b)	$-7, -5$	M1	for factorisation, eg $(x + 5)(x + 7)$ $(= 0)$ **or** for use of formula eg $(x =) \frac{-12 \pm \sqrt{12^2 - 4 \times 1 \times 35}}{2 \times 1}$ **or**	
			for completing the square, eg $(x + 6)^2 - 1 = 0$	
		A1	cao
