13

Write down the three inequalities that define the shaded region.

All three boundary lines are solid: include equality.

Horizontal boundary: y = −2

The region is above it: y ≥ −2.

1 mark
Identify y = −2

Through (0, 0) and (2, 2): y = x

The region is above this line: y ≥ x.

1 mark
Identify y = x

The other line has gradient ½ and intercept 1.

The region is below it: y ≤ 0.5x + 1.

y ≥ −2

y ≥ x

y ≤ 0.5x + 1

1 mark
Identify y = 0.5x + 1

1 mark
All three inequality signs correct

(Total for Question 13 is 4 marks)
