3 Jean records the maximum daily temperature each day for 10 days.
She also records the number of children going to a paddling pool for each of these days.

She draws this scatter graph for her information.

Jean's information for one of these days is an outlier on the scatter graph.

(a) Give a possible reason for this.

.....

.....

(1)

(b) What type of correlation does the scatter graph show?

.....

(1)

On the 11th day, the maximum daily temperature was 19 °C.

(c) Write down an estimate for the number of children going to the paddling pool on the 11th day.

.....

(1)

It would not be sensible to use the scatter graph to predict the number of children going to the paddling pool on a day when the maximum daily temperature was 13 °C.

(d) Give a reason why.

.....

.....
