12			shown	4	M1 for a method leading to the evaluation of another angle in triangle *ABC*, e.g. *ABC* = 46 or *BAC* = 180 – 113 (= 67) A1 *ACB* = 67 C1 for all appropriate reasons related to method shown, e.g. vertically opposite angles are equal, angles on a straight line add to 180º, angles in a triangle add up to 180º C1 for concluding statement, e.g. *ACB* = *BAC* = 67° and isosceles triangle has two equal angles
