

Paper: 1MA1/1H				
Question	Answer	Mark	Mark scheme	Additional guidance
17	4	P1	for process to find ratio of corresponding lengths, eg. $\sqrt{4} : \sqrt{9}$ ($= 2 : 3$)	This may be seen by checking their volume, eg. $"8" \times 4$ ($= 32$) and $"8" \times 3$ ($= 24$)
		P1	for process to find ratio of volumes, eg $"2"^3 : "3"^3$ ($= 8 : 27$)	
		P1	for $"27" \div "8"$ ($= 3.375$)	
		A1	for rounding to give an answer of 4 from correct working	An answer of 4 with no supportive working gets no marks
