6 A pattern is made from four identical squares.

The sides of the squares are parallel to the axes.

Point A has coordinates (6, 7)
Point B has coordinates (38, 36)
Point C is marked on the diagram.

Work out the coordinates of C.

Total horizontal width = 38 − 6 = 32

1 mark
Find the total width

Side of each square = 32 ÷ 4 = 8

1 mark
Four equal horizontal widths

C is two square-widths to the right of A.

x = 6 + 2 × 8 = 22

1 mark
Find the x coordinate

C is two square-heights below B.

y = 36 − 2 × 8 = 20

1 mark
Find the y coordinate

1 mark
Coordinates in the order (x, y)

(22 , 20)

(Total for Question 6 is 5 marks)
