

| Question | Answer                        | Mark | Mark scheme                                                                                                                                                                   | Additional guidance         |
|----------|-------------------------------|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|
| 22       | Probabilities should sum to 1 | C1   | for stating that the probabilities should total 1<br>eg 0.25 should be 0.35                                                                                                   | Can be shown on the diagram |
|          | 0.35 and 0.65 reversed        | C1   | for recognising that the 0.35 and 0.65 in the first branches for the 2nd throw should be reversed<br>eg, “for the second throw, the probability it lands on 4 should be 0.65” |                             |
