17 5 tins of soup have a total weight of 1750 grams.
4 tins of soup and 3 packets of soup have a total weight of 1490 grams.

Work out the total weight of 3 tins of soup and 2 packets of soup.

Find one tin:

Tins	Grams
5	1750
1	350

(÷5 from Tins to 1; ÷5 from Grams to 350)

$$5 \overline{)1750} = 350$$

1 mark
1750 ÷ 5 = 350 g

Four tins = 4 × 350 = 1400 g

Three packets = 1490 − 1400 = 90 g

1 mark
Subtract the weight of four tins

Find one packet:

Packs	Grams
3	90
1	30

(÷3 from Packs to 1; ÷3 from Grams to 30)

Three tins and two packets:

3 × 350 + 2 × 30 = 1110 g

1 mark
Combine the correct numbers of each

1 mark
Correct total

1110 grams

(Total for Question 17 is 4 marks)
