21 The scatter graph shows the maximum temperature and the number of hours of sunshine in fourteen British towns on one day.

One of the points is an outlier.

(a) Write down the coordinates of this point.

1 mark
The isolated point is (10, 19)

(10 , 19)

(1)

(b) For all the other points write down the type of correlation.

1 mark
Both quantities tend to increase

Positive

(1)

1 mark
Use a suitable best-fit line and read across from 16.4°C.

On the same day, in another British town, the maximum temperature was 16.4 °C.

(c) Estimate the number of hours of sunshine in this town on this day.

Read the line on page 14: about 12.7 hours.

12.7 hours

1 mark
Accept an estimate from 12 to 13 hours

(2)

A weatherman says,

"Temperatures are higher on days when there is more sunshine."

(d) Does the scatter graph support what the weatherman says?
Give a reason for your answer.

Yes. Apart from the outlier, towns with more hours of sunshine tend to have higher temperatures.

1 mark
Positive association in context
