24

The area of square $ABCD$ is 10 cm^2.

Show that $x^2 + 6x = 1$

Each side is $x + 3$, so $(x + 3)(x + 3) = 10$.

×	x	$+3$
x	x^2	$+3x$
$+3$	$+3x$	$+9$

1 mark
Express the square area

$x^2 + 3x + 3x + 9 = 10$

1 mark
Expand and use area 10

$x^2 + 6x + 9 = 10$

$-9 \qquad -9$

$x^2 + 6x = 1$

1 mark
Subtract 9 from both sides

(Total for Question 24 is 3 marks)
