3 Work out 54.6×4.3

First calculate 546 × 43.

×	500	40	6
40	20000	1600	240
3	1500	120	18

1 mark
All partial products with place value and an organised sum

20000 + 1600 + 240 = 21840

1500 + 120 + 18 = 1638

21840 + 1638 = 23478

1 mark
Correct digits

Both original numbers have one decimal place.

Divide 23478 by 100: 234.78

1 mark
Correct decimal placement

234.78

(Total for Question 3 is 3 marks)
