13

(a) Rotate shape **A** 90° clockwise about centre *O*.

(2)

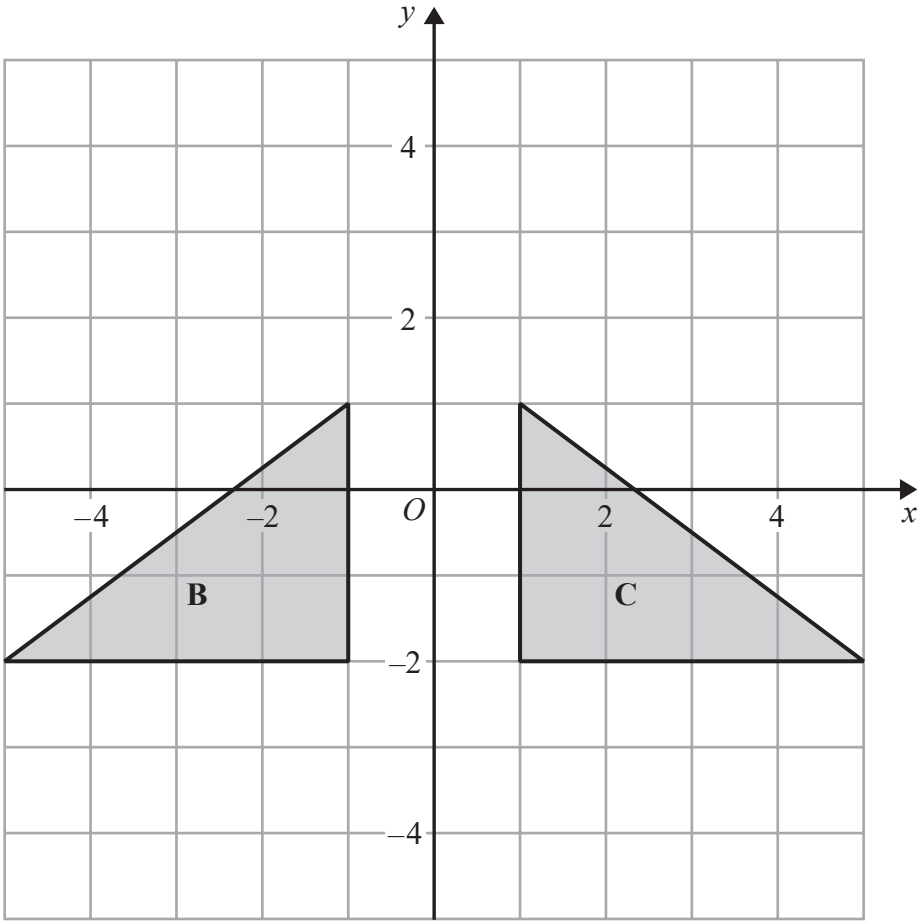

A 90° clockwise turn maps (x, y) to (y, -x).

The vertices become (-1, -2), (-4, -4),

(-4, -1) and (-3, -1).

2 marks total

Correct shape, position and orientation

(b) Describe fully the single transformation that maps triangle **B** onto triangle **C**.

Reflection in the y-axis (the line x = 0).

1 mark
Name the transformation

1 mark
Identify the mirror line

(2)

(Total for Question 13 is 4 marks)
