23 A number, n, is rounded to 2 decimal places.
The result is 4.76

Using inequalities, write down the error interval for n.

Half of 0.01 is 0.005.

4.76 − 0.005 = 4.755; 4.76 + 0.005 = 4.765

2 marks total
Include the lower bound; exclude the upper

$4.755 \leq n < 4.765$

(Total for Question 23 is 2 marks)
