6 There are 495 coins in a bottle.

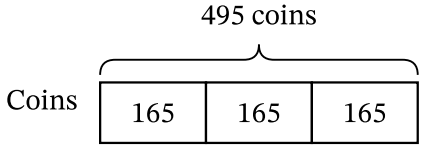

$\frac{1}{3}$ of the coins are £1 coins.

124 of the coins are 50p coins.

The rest of the coins are 20p coins.

Work out the total value of the 495 coins.

Split 495 coins into 3 equal groups.

£1 coins: 495 ÷ 3 = 165, worth £165

1 mark
Value of £1 or 50p coins

50p coins: 124 × £0.50 = £62

20p coins: 495 – 165 – 124 = 206

1 mark
Number of remaining coins

20p coins are worth 206 × £0.20 = £41.20

Total = £165 + £62 + £41.20 = £268.20

1 mark
Complete process; all values in pounds

1 mark
Correct total

£ 268.20

(Total for Question 6 is 4 marks)
