11 $T = 4v + 3$

(a) Work out the value of T when $v = 2$

$T = 4 \times 2 + 3 = 11$

1 mark
Correct value

1 mark
Substitute v = 2

$T =$ 11

(2)

(b) Make v the subject of the formula $T = 4v + 3$

$T = 4v + 3$

$-3 \qquad -3$

$T - 3 = 4v$

$\div 4 \qquad \div 4$

1 mark
Divide both sides by 4

1 mark
Subtract 3 from both sides

$v = \dfrac{T - 3}{4}$

(2)

(Total for Question 11 is 4 marks)
