9 The box plot shows information about the distribution of the amounts of money spent by some male students on their holidays.

2 marks total
All 5 summary values plotted

(a) Work out the interquartile range for the amounts of money spent by these male students.

Read lower quartile £150 and upper quartile £330.

Interquartile range = 330 – 150 = £180.

1 mark
Use upper quartile minus lower quartile

1 mark
Correct difference

£ 180

(2)

The table below shows information about the distribution of the amounts of money spent by some female students on their holidays.

	Smallest	Lower quartile	Median	Upper quartile	Largest
Money spent (£)	60	180	300	350	650

(b) On the grid above, draw a box plot for the information in the table.

(2)

Chris says,

"The box plots show that the female students spent more money than the male students."

(c) Is Chris correct?
Give a reason for your answer.

Yes, in terms of the median.

The female median is £300; the male median is £250.
