13 Here are six straight line graphs.

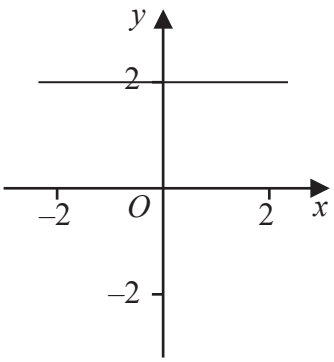

Graph **A**

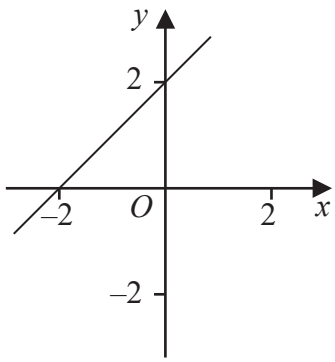

Graph **B**

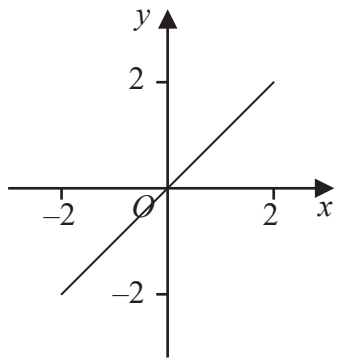

Graph **C**

Graph **D**

Graph **E**

Graph **F**

Match each equation in the table to the correct graph.
Write the letter of the graph in the table.

Equation	Graph
$y = 2$	D
$y = x$	F
$x + y = 2$	A

2 marks total
All three graphs matched correctly

(Total for Question 13 is 2 marks)

$y = 2$: horizontal line at height 2.

$y = x$: through the origin, gradient 1.

$x + y = 2$ means $y = 2 - x$: intercept 2, gradient -1.
