16 Alan, Bispah and Chan share a sum of money.

Alan gets $\frac{1}{8}$ of the money.

Bispah gets $\frac{1}{2}$ of the money.

Chan gets the rest of the money.

Alan gets £2.50

(a) Work out how much money Bispah gets.

A = Alan; B = Bispah; C = Chan. Each unit is £2.50.

£20

A	B	B	B	B	C	C	C

Whole = 8 × £2.50 = £20. Bispah has 4 of the 8 units.

1 mark
Use the value of one equal unit

4 × £2.50 = £10

£ 10

1 mark
Bispah's share

(2)

(b) Find the ratio

amount of money Alan gets : amount of money Chan gets

Give your answer in the form $a : b$ where a and b are whole numbers.

Chan has 8 − 1 − 4 = 3 units.

1 mark
Find the share left for Chan

Alan has 1 unit; Chan has 3 units.

Alan : Chan = 1 : 3

1 mark
Write the two shares as a ratio

1 mark
Whole-number ratio in the correct order

1 : 3

(3)

(Total for Question 16 is 5 marks)
