12 AB and BC are perpendicular lines.

(a) Find the value of x.

$x = 90 - 25 - 25 = 40°$

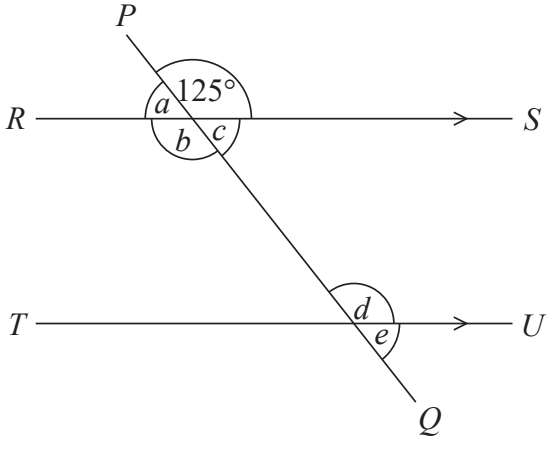

1 mark
Subtract from 90°.

1 mark
40°.

$x =$ 40

(2)

RS and TU are parallel lines.
PQ is a straight line.

An angle of size 125° is shown on the diagram.

(b) (i) Write down the letter of one other angle of size 125°
Give a reason for your answer.

b

1 mark
Angle b is 125°.

Vertically opposite angles are equal.

1 mark
Correct linked reason.

(2)

(ii) Explain why $a + b + c = 235°$

Angles around a point add to 360°.

$a + b + c = 360° - 125° = 235°$

1 mark
Use the angles around this point.

(1)

(Total for Question 12 is 5 marks)
