(1)

Fiona has to work out the exact value of $48 \div \frac{1}{2}$

She writes

$$48 \div \frac{1}{2} = 24$$

Fiona's reason is,

"There are 2 halves in 1, so there will be 24 halves in 48"

(b) Explain what is wrong with Fiona's reason.

She divided by 2, but should multiply by 2.

There are 2 halves in each whole,

so there are 48 × 2 = 96 halves in 48.
